They suspected that the desperate man's
remains might be in the ruins, but on
account of the glowing embers could
make no investigations. They relatined
to the house and with Hutchings began
to make investigations there with the
said of a lantern.
Here they lound evidence of another
insane attempt of Brooks to destroy the
girl and her mother. The flend had
tried to set the house on fire directly
under the window of Miss Qualic' bedroom. He had poured kerosane on the
boards and applied a match. The fire
had charred the wall for a space of
about a foot in diameter and had also
burned through, but the blaze had died
out.
It is supposed that failing in this way to the conclusion that Brooks had set it

The proposition to abrogate the existgiven with any degree of propriety.

Arguments of not a little weight are advanced both for and against givegation anced both for and against to decide nd it is not an easy matter to decide which course is the more strongly dely the interests of this country

nucled by the interest the Restances believes that better results would acknow the abrogation of the treaty. since of trade nuder it being against us to the extent of about \$5,000,000 annually. This is in itself a formidable argument against the perpetuation of the treaty, and its force is increased by the fact that the chief article of import from that country is sugar, produced by Chimese and Japanese labor, and which comes in preserving any approximation of the country is sugar, and which comes in preserving any approximation of the country is sugar, and which comes in preserving any approximation of the country is sugar, and which comes in the country is sugar, and which country is sugar, and the country is sugar, a and Japanese labor, and which in nurestricted compati-with domestic best sagar pro-m. This latter feature of the ion is of special importance to eituation is of special importance to California, and if the abrogation of the treaty is desired, as claimed by Claus Sprackies and other sugar manufactur-ers, for the purpose of rapidly develop-ing the bust sugar industry in this state, ing the best sugar industry in this state, there can be no question where our interests lie. The Hawaiian trade, or such part of it as might be cut off by abregating the treaty, is a bagatelle compared to the importance of the best

Possibly that opinion is a correct one, but on the other hand, it may be a very narrow and near-sighted view of the situation. At any rate it is the interests of the state at large which must be considered, and from that tendpoint the propositions of accompany a sphase to be in and from that etandpoint the proposal from that etandpoint the present devance of argument appears to be in favor of ending a treaty by which we concede much and receive little in re-

Hos. James Wilson as necretary of agriculture is evidently the right man agriculture is evidently the right man in the right place. He is not devoting his time to writing treatises on the financial question to holster up somebody's theory, but is actively at work promoting the sale of American products in foreign markets and in making practical reforms in the administration of his department generally. The agricultural department affords a great field for imdepartment anords a great tied not ab-portant service by an energetic, practi-cal and conscientions man, such as Mr. Wilson gives evidence of being, and good results may be confidently expected.

Lady Flint Breaks a World's

SECOND DAY OF THE MEETING

Jenuie D's Jockey-

track.

There were more ladies on the club house balcony and in the grand stand yesterday than on the day before and the some around the prob box was also more animated. There are fewer gennes of chance than have ever been seen at a race meeting here, but, then, victims are menting here, but, then, victims are much scarcer.

The first caves a four and a half furloug dash, the startes being Durango, Kell Light, Quickeilver, Mystle H. and Mendicant. Polaski and Stocking had been entered, but were scratched, Quickeilver rold favorite in the moist, Red Light and Mystle H. sharing the favor for place. Quickeilver led from the start and maintained his lead to the wire, finishing three lengths abund of the wire, finishing three lengths abund of the wire, finishing three lengths abund of the world erecord.

The second event on the card was a half-mile dash for ponies, and in this race the world arecord was smashed by Codwell's Lady Flint. The starters were Mickinley, Lady Flint and Peranne and Itad Jacket was the favorite in the poole, settling 3 to 3. Just Flint and Peranne and Itad Jacket a close third. Time, 0.50, which establishes a new world's record for ponies at that distance. The former record was 0.51.

The last race was a three-eighths and raport, The horseth that started were Sontag. Torollate, Law Kern, Nevita, Silver Tail, Los Baiso Kid and Jennie D. Jennie D. was into the etect. In the three the pickey's nectilar manner of redding asserted treatly, as it had done the day before, and sont and Lady Flint third. Time, 0.50, when establishes a new world's record to the day before, and considerable complaint over the manner of demisely 's jockey's riding, These manner of demisely 's jocke

Sontag won. Jonnie D came in a common and Lady Flint third. Time, 0.251.52.

There was considerable complaint over the manner of Jennied. "sjockey's riding, it being claimed that he had mulled the horse. Others, however, thought it merely a case of poor riding. At all events the juckey should receive the astention of the judges. The finish in the second heat was in the suma order as in the first and the time was .57.54.

All in all the racing was of a highly ratisfactory character and the many who didn't attend missed something worth seeing. It is hoped the patronage during the remaining days of the meet will be much better. Secretary Rockman had gone to considerable superant to formich first-class eport and deserves encouragement. A very interesting program has been arranged for today, a limited race being among the events. Increase entered and their tymers are as follows.

First race, even-eighths of a mile First race, even-eighths of a mile formich, it is shown in the second and their two mers are as follows.

First race, even-eighths of a mile first-race, even-eighths of a mile second formich, J. S. Morent, Aptos, J. Krones (Hymen, J. G. Marion; Shuron Lase, G. L. Waring.
